PROFESSIONAL SUMMARY

Full Stack Engineer with 1.4+ years of experience designing scalable MERN-based ERP and workflow systems. Expertise in REST API architecture, Redux state management, centralized error handling, input validation, pagination for large datasets, and backend performance optimization.

Improved MongoDB efficiency by 25% and maintained production-grade quality through structured code reviews and unit testing.

PROFESSIONAL EXPERIENCE

Braincells Technology, Full Stack Developer

02/2025 – 12/2025

- Architected modular ERP platform (CRM, Sales, Finance, Procurement)
- Designed 15+ REST APIs (<300ms) using MVC architecture
- Implemented JWT-based RBAC securing 5+ roles
- Built centralized error-handling middleware & validation layer
- Implemented server-side pagination for optimized data retrieval
- Optimized MongoDB performance by 25% via indexing & aggregation
- Conducted peer code reviews and developed unit tests

Elansol Tech, Full Stack Developer

08/2023 – 02/2024

- Developed SOP workflow management platform using MERN
- Built multi-level approval lifecycle APIs with role transitions
- Implemented Firebase Auth and optimized database schema

TECHNICAL SKILLS

Frontend: React.js, TypeScript, Redux, Toolkit, Tailwind CSS, **Backend:** Node.js, Express.js, REST APIs, Middleware, Pagination,

Database: MongoDB, MySQL, firebase Firestore, **Architecture:** JWT, RBAC, Error Handling, Input Validation, **Quality:** Unit

Testing, Code Reviews, Performance Optimization, **Tools:** Render, Vercel, Netlify, Git, GitHub, Agile, Jira

KEY PROJECTS

Real Estate ERP, Enterprise-grade platform for real estate builders

- Designed and developed a multi-module ERP system covering Project Management, Sales, CRM, Finance, Legal, Loan Processing, Vendor, Contractor, and Procurement workflows
- Implemented end-to-end role-based access control with dynamic dashboards for Admin, Sales, Finance teams.
- Implemented Firebase Authentication with role-based access control, ensuring secure user management and optimized large-scale data handling through server-side pagination and indexing.

LMS Platform, Role-based learning management system (MERN)

- Built a secure course management system with protected APIs and Redux-based state architecture.
- Developed dynamic dashboards for Admin, Instructor, and Student roles with real-time course and progress tracking.

SOP Workflow System, Industrial approval and compliance platform (MERN)

- Developed a factory-grade hierarchical approval engine supporting multi-level workflow transitions and role-based permissions.
- Built real-time status dashboards for supervisors and management to monitor process lifecycle tracking.
- Integrated Jwt authentication and optimized database schema for scalable workflow execution.

EDUCATION

Masai School, Full Stack Web Development

06/2024 – 02/2025

Rungta College of Engineering & Technology, Bachelor of Computer Science

2017 – 2021
